

EPIC BUNDLE

(with A-Series 65a)

Commercial Ice Water Hash Extraction System

hashtek.ca

EPIC BUNDLE

(w/ A-Series 65 gal)

The **Hashtek Epic Bundle** is engineered as a complete wash lab to produce the cleanest, highest-quality ice water hash possible. Featuring a 300-gallon water tank, 1.5 HP chiller, and continuous recirculation system, it delivers consistent 35°F water on demand at a fraction of the cost of comparable systems.

Unlike bottom-impeller agitators that create destructive vortices, the Epic Bundle promotes true free-flow washing, dramatically reducing contamination and fines.

Why Hashtek Agitation is Different

Top-Down Agitation

- Most washing machines and drill-style mixers use bottom impellers that create strong vortices.
- These vortices can shear trichome heads and macerate plant material, introducing unwanted contamination.
- The A-Series eliminates bottom agitation entirely.
- Instead, the paddle gently mobilizes the wash from above while filtered water continuously pulls trichomes away from biomass.
- **The result is cleaner heads, better color, and improved terpene preservation.**

KEY ADVANTAGES

True Free-Flow Washing

Top-down agitation gently mobilizes trichomes while allowing them to separate naturally from biomass.

Continuous Recirculation Compatible

Designed to work with modern recirculation workflows that keep trichomes moving away from plant material during agitation.

Designed for Real Hash Labs

The A-Series was built around stainless vessels used by professional solventless labs and integrates seamlessly with 30, 50, and 65-gallon washing systems.

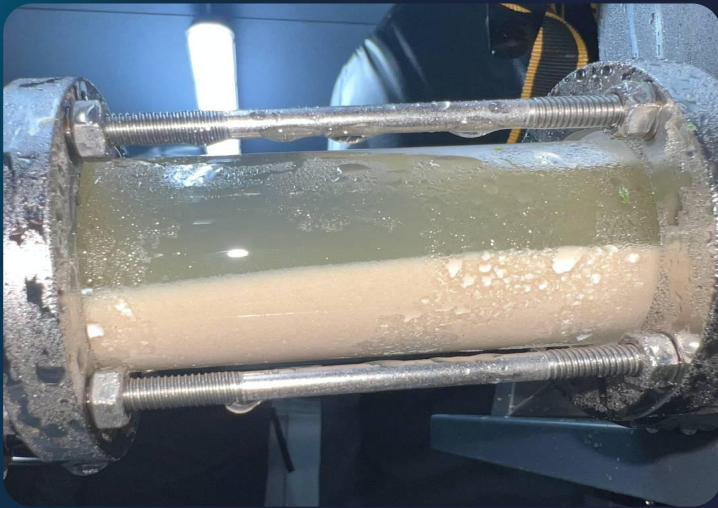

Gentle but Powerful

Programmable agitation recipes allow operators to run gentle, medium, or aggressive wash cycles depending on material type and desired output.

Built for Daily Production

Heavy-duty stainless construction, commercial gearboxes, and industrial controls ensure reliable performance for high-volume facilities.

Production Capability

Typical workflow using a 65-gallon tank:

- Process up to 20,000 grams fresh frozen
- 45–60 minute wash cycles
- Three agitation pulls (20 minutes each)

The A-Series dramatically reduces labor while increasing throughput compared to hand washing.

Continuous Workflow

The Epic Bundle is designed to eliminate downtime between washes and keep your system running at full capacity.

- No waiting on water to cool down
- No constant ice loading or swapping
- Consistent conditions from run to run
- Built for back-to-back wash cycles

By removing bottlenecks in water management, the system allows operators to focus on washing, increasing daily throughput while maintaining quality.

DESIGNED BY HASHMAKERS

Hashtek equipment is built by people who actually wash hash.

Every design decision — from paddle geometry to agitation programming — was developed through real-world solventless production.

FEATURE BREAKDOWN

TECHNICAL SPECIFICATIONS

VOLTAGE	OPTIONAL VOLTAGE	MOTOR	FRAME
115V Single Phase (recommended)	230V Single Phase	Stainless Steel Washdown Motor	304 Stainless Steel TIG Welded
CONTROLS		WEIGHT	CONNECTIONS
7" LCD Touch Screen or Analog Control		~500 lbs	1.5" Sanitary Tri-Clamp

ELECTRIC REQUIREMENTS

1.5HP Chiller

- 230V, draws up to 13A
- Requires dedicated 230V / 20A circuit (L6-20R or hardwired)

Hashtek 65A System (with 2 pumps)

- 115V, draws up to 13A
- Requires dedicated 115V / 15 or 20A circuit (standard outlet)

Electrical Requirements

COMPONENT	VOLTAGE	FULL LOAD AMPS	MINIMUM CIRCUIT	PLUG
A-Series (115v)	115V	10A	13A	NEMA 5-15
A-Series (220v)	230V	8A	11A	EU Type C / NEMA L6-15
Water Chiller	230V	10A	13A	Hardwire or use L6-20R
Pumps	115V/230 V	1-3A	2-5A	NEMA 5-15 (115V) EU Type C (230V)

System Power

Components are designed to run on separate circuits

- Chiller should be installed on a dedicated 230V circuit
- Standard North American facilities can support this system without upgrades
- International configurations available upon request
- Chiller installation should be completed by a qualified electrician
- All components are 50/60Hz compatible for international use

Construction

- 304 stainless steel frame
- TIG welded sanitary construction
- stainless washdown motor
- commercial gearbox
- quick-release hybrid paddle
- emergency stop safety button

Tank Compatibility

Compatible with:

- 25 gallon tanks
- 30 gallon tanks
- 44 gallon tanks
- 50 gallon tanks
- 65 gallon tanks

Smaller tanks use bracket adapters and alternate paddles to maintain proper paddle positioning.

Dimensions

Agitator Only:

- 48" L × 21" W × 42" H

Recommended System Pairings

The Epic Bundle is often paired with:

- Freeze Dryer (Holland Green, HR)
- BubbleTek for smaller Pheno Hunts
- Rosin Press (Daxtractor)
- Additional A-Series 65a for increased capacity
- Hash Lab Banner / Sign

MADE IN CANADA

All Hashtek A-Series agitators are designed and assembled in Canada using commercial-grade components built for continuous production environments.
